

NABC FORUM

Strategies for Safeguarding American Plant Resources

Featuring Daniel A. Fieselmann

USDA APHIS PPQ CPHST National Science
Program Leader for Survey, Detection, and Identification

Date: Thursday, September 4th 2008

Time: 3:00 pm

Venue: KSU Union, Room 213

Sponsors: K-State Dept of Geography
K-State Dept of Plant Pathology

Mr. Daniel Fieselmann is the current Chair of the Phytosanitary Alert System Panel for the North American Plant Protection Organization and the Chair of the Plant Protection and Quarantine (PPQ) Safeguarding Review Steering Committee overseeing the contracted review of PPQ pest exclusion, detection and eradication activities. He is presently overseeing agency implementation of recommendations.

To build upon K-State's heritage of success in the agricultural and health sciences, the National Agricultural Biosecurity Center (NABC) Forum facilitates campus-wide, interdisciplinary interaction. At Forum gatherings, K-State faculty share activities, successes, and initiatives. By gathering periodically, we hope to better perceive and pursue opportunities to advance the university's agricultural and food security programs. This month's talk has been co-sponsored by the KSU Departments of Geography and Plant Pathology.
